WHAT IS CLAIMED IS

- 1. A skin cleansing composition comprising from about 5 to 40% by weight of an anionic surfactant, from about 0.5 to 20% by weight of a cationic polymer and from about 0.1 to 20% by weight of at least one skin-residual substance selected from the group consisting of cosmetic powders and liquid oils.
- 2. The skin cleansing composition according to Claim 1, wherein the anionic surfactant is at least one compound selected from the group consisting of an alkyl sulfate, an alkyl ether sulfate, a fatty acid soap, a monoalkyl phosphate, an acyl L-glutamate, an acyl isethionate, and mixtures thereof.
- 3. The skin cleansing composition according to Claim 1, wherein the cationic polymer is at least one compound selected from the group consisting of a homopolymer or a copolymer of dimethyldiallylammonium chloride, a cationic cellulose, a cationic guar gum, and mixtures thereof.
- 4. The skin cleansing composition according to Claim 1, wherein a cationic charge density of the cationic polymer is 0.001 or more.
- 5. The skin cleansing composition according to Claim 1, wherein the cosmetic powder is a flaky powder.

- 6. The skin cleansing composition according to Claim 1, wherein the liquid oil is at least one compound selected from the group consisting of a silicone oil, a hydrocarbon oil, an ester oil, an ether oil, and mixtures thereof.
- 7. The skin clean sing composition according to Claim 1, wherein the viscosity at 25°C of the liquid oil is in a range of 1 to 10,000 mPa·s.
